(2) Landscape and aesthetic value

The object of this value is to identify trees that are of particular importance to the community due to their substantial contribution to the surrounding landscape.

A tree may be considered to be of landscape and aesthetic value if it is situated in a prominent location when viewed from a public place and it:

- (a) contributes significantly to the surrounding landscape based on its overall form, structure, vigour and aesthetic values; or
- (b) represents an outstanding example of the species, including age, size or habit; or
- (c) is an exceptional example of a locally native species that reached maturity prior to urban development in its immediate vicinity.

Statement against the Criteria

This *Eucalyptus melliodora* is an exceptional example of the species located in the suburb of Amaroo. The tree has been selected for inclusion to the ACT Tree Register because of the outstanding aesthetic and landscape values it provides.

This very large tree has a single trunk with a large spreading canopy. It has a very unusual branch habit where the main trunk bends over to form a lateral branch. The tree has a height of approximately 20.0meters, a canopy width of 28.0 metres and a trunk circumference of 5.2metres. The tree is in exceptional health and condition and is located in a very prominent position on the corner of Lander Crescent and Roderick Street Amaroo. Inclusion to the ACT Tree Register may allow this beautiful tree to be appreciated by the wider Canberra community.
