Number of trunks:	2
Grid co-ordinates: MGA	E 693023 N 6078826

Registration Criteria that presently apply, other criteria may apply after further assessment.

(2) Landscape and aesthetic value

The object of this value is to identify trees that are of particular importance to the community due to their substantial contribution to the surrounding landscape.

A tree may be considered to be of landscape and aesthetic value if it is situated in a prominent location when viewed from a public place and it:

- (a) contributes significantly to the surrounding landscape based on its overall form, structure, vigour and aesthetic values; or
- (b) represents an outstanding example of the species, including age, size or habit; or
- (c) is an exceptional example of a locally native species that reached maturity prior to urban development in its immediate vicinity.

Statement against the Criteria

This *Eucalyptus melliodora* is located on the street verge adjacent to Proctor and Maclean Street in Chisholm. The tree is an exceptional example of a local native species that reached maturity prior to urban development. The tree is fully mature and dominates the landscape due to its large size and grand appearance. It will be many years before any of the street tree plantings meet the same level of grandeur.
