(2) Landscape and aesthetic value

The object of this value is to identify trees that are of particular importance to the community due to their substantial contribution to the surrounding landscape.

A tree may be considered to be of landscape and aesthetic value if it is situated in a prominent location when viewed from a public place and it:

- (a) contributes significantly to the surrounding landscape based on its overall form, structure, vigour and aesthetic values; or
- (b) represents an outstanding example of the species, including age, size or habit; or
- (c) is an exceptional example of a locally native species that reached maturity prior to urban development in its immediate vicinity.

Statement Against the Criteria

This group of 19 mixed remnant Eucalypts has been nominated for inclusion on the ACT Tree Register due to the outstanding landscape contribution they provide.

The group consists of *Eucalyptus melliodora*, *Eucalyptus blakelyi* and *Eucalyptus bridgesiana*. Not all the trees within in the group are exceptional examples however they are important as a representative of the grassy woodland community which was once more common in this part of Canberra being. The trees meet the criteria for inclusion due to the collective landscape and aesthetic value they provide within the suburb.
