Registration Criteria that presently apply, other criteria may apply after further assessment.

(1) Natural or cultural heritage value

The object of this value is to identify trees that are of particular importance to the community due to their intrinsic heritage values.

A tree may be considered to be of natural or cultural heritage value when it is:

- (a) associated with a significant public figure or important historical event; or
- (b) of high cultural heritage value to the community or cultural group, including trees associated with aboriginal heritage and culture; or
- (c) associated with a heritage nominated place and representative of that same historic period.

(2) Landscape and aesthetic value

The object of this value is to identify trees that are of particular importance to the community due to their substantial contribution to the surrounding landscape.

A tree may be considered to be of landscape and aesthetic value if it is situated in a prominent location when viewed from a public place and it:

- (a) contributes significantly to the surrounding landscape based on its overall form, structure, vigour and aesthetic values; or
- (b) represents an outstanding example of the species, including age, size or habit; or
- (c) is an exceptional example of a locally native species that reached maturity prior to urban development in its immediate vicinity.

Statement against the Criteria

These trees are important because of their cultural, heritage and landscape values. This group of trees are in excellent health and provide a significant aesthetic contribution within the Northbourne Housing Precinct. The Precinct was designed by Sydney Ancher, a noted modernist architect. The Heritage Council resolved on 12 February 2015 to register a portion of the Northbourne Housing Precinct on the ACT Heritage Register. These trees are not within the boundary of the portion of the Precinct that the Heritage Council resolved to register but the Heritage Council believes that the trees do provide a notable avenue of mature trees associated with the Northbourne Housing Precinct that define an open space.
