Species description
- Deciduous
- Small open-branched tree, arching at the crown
- Attractive exfoliating cinnamon coloured bark in various shades
- Green leaves turning to red and orange in autumn
- Masses of pale pink flowers in large panicles from late summer to autumn
- Insignificant fruit

Height and width
8 metres tall by 8 metres wide

Species origin
Created in the US National Arboretum by crossing *L. indica* and *L. fauriei*, originally from China and Taiwan

Landscape use
- Available Soil Volume required 19m$^3$
- Good for use in streets such as cul-de-sacs
- Suitable for use in suburban shopping centres, parks and home gardens
- Requires a minimum clearance of 5 metres from buildings

Use considerations
- Suitable for Canberra’s climate
- High frost and drought tolerance once established
- Suits most soils from loams to clays
- **Medium longevity**
- Moderate rate of growth
- Very low flammability
- Grows best in full sun
- Mildew resistant
- Light formative pruning can be undertaken when young to create a high canopy

Examples in Canberra
Not known in Canberra in public plantings
