**Registration Criteria that presently apply.**

**(2) Landscape and aesthetic value**

The object of this value is to identify trees that are of particular importance to the community due to their substantial contribution to the surrounding landscape.

A tree may be considered to be of landscape and aesthetic value if it is situated in a prominent location when viewed from a public place and it:

- (a) contributes significantly to the surrounding landscape based on its overall form, structure, vigour and aesthetic values; or
- (b) represents an outstanding example of the species, including age, size or habit; or
- (c) is an exceptional example of a locally native species that reached maturity prior to urban development in its immediate vicinity.

**Statement Against the Criteria**

This *Eucalyptus melliodora* (Yellow Box) is located in a prominent position on unleased Territory land, in close proximity to the Banksia Street wetland. The tree adds significantly to the surrounding landscape due to its overall form, size and aesthetic contribution. The tree is an important habitat for local bird species as noted by parrot hollows and mud lark nests. The inclusion of this tree to the ACT Tree Register will promote a better appreciation of remnant trees and how they can be retained within an urban environment, as very few trees of this stature remain in the inner city suburbs of Canberra. The tree will continue to be inspected and maintained by the Tree Management Unit within Park Conservation and Lands.
